

Paper Caper

What is it

The Paper Caper allows you to train your finger joints and experience at least ten minutes of geeky, hypnotic, memorable fun. The “Optical” Paper Caper can be used as a decoration to hang on either your Christmas tree or any other spiky thing that you can find in your home. Print it, build it, cut a small hole by the base of one of the triangles, put a ribbon through the hole, tie it and hang it. You will find yourself staring at it for hours.

You can also use the “Optical” Paper Caper as a paper toy, a place card, or for any other purpose that comes to mind. As far as we are concerned, folding paper is a free activity that should be enjoyed without any sort of restrictions.
